DENTURE CARE INSTRUCTIONS

- Do not sleep with your dentures. This gives the gums a chance to rest and prevents infection
- Place dentures in a glass of water overnight
- Clean dentures every night with sunlight liquid and warm water & a toothbrush. Do not use toothpaste as it is abrasive.
- Wash dentures over a sink full of water or a 2 litre container of water. This prevents the denture from hitting a hard surface and breaking.

ENJOY YOUR DENTURES & KEEP SMILING!
